

PADI Advanced Openwater Course

Exploration, Excitement, Experiences.

They're what the PADI Advanced Open Water Diver course is all about. And no, you don't have to be "advanced" to take it – it's designed so you can go straight into it after the PADI Openwater Diver Course. The Advanced Open Water Diver course helps you increase your confidence and build your scuba skills so you can become more comfortable in the water. This is a great way to get more dives under your belt while continuing to learn under the supervision of your PADI instructor. This course builds on what you've learned and develops new capabilities by introducing you to new activities and new ways to have fun scuba diving.

The **PADI Advanced Openwater** course is your next step into the underwater world after completing the Openwater Certification. This course comprises of 5 Adventure Dives including 2 'required' dives. The **Deep** dive extends your previous recommended depth limit from 18m to 30m; and the **Underwater Navigation** dive, which will increase your confidence underwater by developing your compass and natural navigation skills. The remaining 3 Adventure Dives could include choices such as Photography, Naturalist, Wreck, Night or Drift diving. These adventure dives are designed to introduce you to specialised diving environments and equipment as well as help you to discover what types of diving appeal to you.
