

PADI Enriched Air (Nitrox)

The PADI Enriched Air (Nitrox) Diver course is PADI's most popular specialty scuba diving course, and it's easy to see why. Scuba diving with enriched air nitrox gives you more no decompression dive time. This means more time underwater, especially on repetitive scuba dives. You can typically stay down longer and get back to the water sooner. No wonder many divers choose this as their very first specialty.

What's included

- Techniques for getting more dive time by using enriched air nitrox
- Theory and practical sessions
- 2 Ocean dives
- PADI Enriched Air Diving Manual & 32% and 36% RDPs
- Enriched air scuba diving equipment considerations
- Managing oxygen exposure, how to tell what's in your scuba tank and how to set your dive computer
- Equivalent Air Depth/Oxygen tables
- Enriched Air tank and Enriched Air fills for the course
- PADI Enriched Air Certification Card

Prerequisites

- To enroll in the PADI Enriched Air Diver course, you must Be 15 years or older
- Have a PADI [Open Water Diver](#) certification (or have a qualifying certification from another organization)
