

CHARLESTOWN DIVING ACADEMY

PADI Night Diver Course

As the sun sets, you don your dive gear slip on your scuba mask and bite down on your dive regulator. A deep breath and you step off the boat – into the underwater night. Although you've seen this reef many times before, this time you drop into a whole new world and watch it come to life under the glow of your dive light.

Most divers find night diving mysterious, yet alluring. At night, the familiar dive sites take on a new aura and new adventure. Darkness lays a veil you penetrate with your lights as you explore. Even the flora and fauna differ as underwater life switches to nocturnal behaviours, and as nocturnal animals emerge. While night diving sounds eerie, perhaps even a bit frightening to some divers, for others it's the first specialty activity they try. Night diving isn't difficult, and a few guidelines and procedures make night diving even more fun and safe.

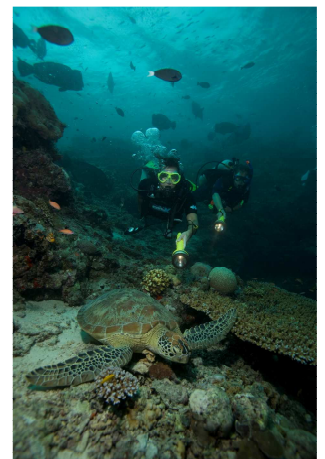

What You Learn

- Night dive planning, organization, procedures, techniques and potential problems
- How to control your [buoyancy](#) at night
- Entries, exits and [underwater navigation](#) at night
- Nocturnal aquatic life, since many of the plants and animals you'll see are different

Prerequisites

- Be a PADI [Open Water Diver](#) or Junior Open Water Diver certification (or qualifying certification from another organization).
- At least 12 years old.
